

BATCH ENTRY PLUS

FOR THE KEYPRIME ACCOUNTS RANGE

BY APPOINTMENT TO
HER MAJESTY THE QUEEN
SOFTWARE SYSTEMS & SERVICES
LANDMARK SYSTEMS LIMITED
WEST SUSSEX

Reduce time spent on data entry. The Batch Entry Plus module enables you to copy and paste transaction data from third party sources directly into the KEYPrime entry grid.

WHO WILL BENEFIT?

ANY BUSINESS RECORDING TRANSACTIONS ON THIRD PARTY SOFTWARE*:

Examples include:

- ✓ POS systems
- ✓ Order processing software
- ✓ Businesses purchasing through buying groups and co-operatives
- ✓ Booking management software
- ✓ Haulage software

*Provided transactions can be exported from that software in a compatible file format.

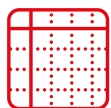

WHAT ARE THE BENEFITS?

Save time. The more transactions you can copy and paste into KEYPrime, the fewer you need to enter manually.

Fewer mistakes. Copy and paste data exactly as it is posted by the third party software including all detail with reduced risk of mistyping.

Efficiency. Coding multiple invoices on one screen assists with coding consistency and ensures coding fields are not missed.

COMPATIBLE FILE FORMATS

Copy and paste:
