

Sheepdata is designed to ease the task of recording events that happen in your sheep enterprise. It will produce the information you need for your records.

It will also link to selected external recording systems such as EID readers, weigh-heads and handheld recording devices.

The records it keeps

Sheepdata has two distinct types of record available, Animal and Flock

The **Home – Animal** Section has an individual record for each animal. Occurrences are recorded against the individual animals.

The **Flock** section keeps records of animals as group and maintains running totals by entering batches of sales, births, deaths and purchases. Individual ear numbers need not be recorded.

Individual animal records for Ewes, Lambs and Rams - both live and dead.

Easy to read records are maintained on each animal.

An individual animal's record can be as simple as its official tag, breed, approximate date of birth and movements.

It can be extended to include parentage, purchase price and life records of health, services, scanning, lambing and weighing.

Ram Performance can also be monitored through the service / lambing records

This gives a complete picture of any animal's performance.

Animal Occurrences

Animal records are generally updated by entering occurrences.

😭 Lambing 🔹	😪 Cull/Casualty 👻 斗 Movements 👻	🚸 Alerts 🔹
😪 Fostering 🔹 💰 Castration	🐅 External Transfer 🔹 🛻 Purchases 🔹	😧 Archive 🔹
🔑 Services 🔹 🤿 Weaning 🔹	🜠 Group Change 👻 🔏 Sales 🔹	Health Treatment *
Scanning *	🕱 Internal Transfer 🔹 📄 Sales Return 🔹	👍 ReTagging 👻
Reproduction Occurrences	Movement Occurrences	Other Occurrences

Occurrences can be entered manually into the system by typing the detail in the appropriate section.

They can also, in many cases, be entered from data recorded on EID tag readers.

In the occurrence Type gives the following options.

Type:	All	Inclu	de: All		
Ear 1	Group	prn	Sex	Breed	Official Tag
00002	Import	03/15	Female	TXL	UK012345600002

Lambing is entered by selecting the ewe and entering the date of lambing. The sire will be selected from the service record of the ewe or, if incorrect, can be selected from the list of sires. Lambing Score can be selected.

If Tagged at Birth is selected the number of lambs is entered and the next available tag numbers are displayed. These can be changed if necessary. Sex of lambs may also be selected. Individual lamb records are then created.

If Tagged Later is selected you simply enter the number lambs per ewe and select the ewes. The number of lambs of each sex may also be entered. These lambs will be added to the Flock totals.

Purchase and Sales can be entered manually by typing in detail or selecting from lists.

They may also be imported from EID reader data.

In Scotland batches of sales and purchases may be imported from ScotEID.

In England extra information may be added for ARAMS reporting. Movements can be reported directly to ARAMS from the program.

Flock Records

These are the details of the animals which have no individual numbers and are held as batches within their flock number.

Purchases are entered either as a batch, the total numbers with a particular flock mark, as block or from a reader (as on left). The Block option will ask for the first EID no. and the number of sheep. It will then allocate EID's in sequence. The reader option will show the full EID no's as read. These EID numbers will be recorded in the background but only totals for each flock number shown in reports.

EID Readers

A Selection of EID readers can be used to record and transfer data. Those shown below are a few of those we have available.

Stick Readers are used to simply record the numbers from animals. These lists can be downloaded back to Sheepdata and used in occurrences such as purchases and sales.

Agrident APR600

Data-loggers are more sophisticated devices which can be pre-loaded with animal data and occurrences. Weighings, health treatments, services, scannings and lambings are a few examples of what can be recorded. These actions can then be transferred back to the program on your PC.

Statutory Reports

These reports are designed to meet your statutory requirement to keep records.

Management and Selective Reporting

A series of pre-designed reports are available in Management Reports. Selective Reports section allow users to create their own reports. An example of a selective report is shown below.

Sheep on Holding Report. Any date can be entered to show animals alive on that date.

Total Anim	mals : 30							
Averages					3			
				.26	6			

This report shows all the lambs born to a particular sire.

Weights and grades can be added after sale. Averages are calculated which can give an indication of ram performance.
