KEYPRIME RANGE SOFTWARE SYSTEM REQUIREMENTS

Supported Operating Systems:
- Microsoft Windows 11 and 10
- Microsoft Windows Server 2016 or newer

Please contact our Technical Support team for further information on server specification.

64-bit versions of Window are supported. If you have Windows in "S Mode" this will need to be disabled.

For additional functionality KEYPrime offers interoperability with Microsoft Office (2016 or newer). As an example, it can use Outlook for emailing invoices.

Suggested system requirements:

Processor:	Intel Core i3 Processor or AMD Ryzen
Memory:	8GB
Storage:	SSD with 10GB available
Display:	1920 x 1080
Other:	Internet

Our products are tested on computers that have all the latest Windows service packs and updates installed. We require that computers running our products are similarly kept up to date.

HOW TO CHECK YOUR COMPUTER'S SPECIFICATION

1. Go to your Start Menu and open "**Settings**" (the icon that looks like a cog)
2. Go to "**System**"
3. Go to "**About**" - this will show your PC's processor and memory
4. Go to "**Display**" - this will show you the resolution of your monitor
5. Go to your "**File Explorer**" and right click on "**Windows (C:)**". Select "**Properties**". This will show your available storage.

Please note: The locations of these values may be slightly different depending on which update of Windows is installed
